August 1, 2019

Because the many criminal actions by the Deep State against Matthew Hale have been made public, it is necessary to present the motive for these crimes as a warning to all freedom loving Americans:

For many years prior to his unlawful arrest, prosecution and imprisonment, Matthew Hale has been harassed by establishment-types including the Mayor and City Council of his own home town. Why? Because Matthew Hale has openly defended the white race. In fact, the infamous "race card" has denied Mr. Hale's First Amendment rights through actions that included FBI attempts to prevent his speaking and TV engagements. Hale was also denied his law license for perfectly legal behavior and beliefs about race – none of which involved any threats to or against any other race!

In 1992, Matthew Hale became a member of "The Church of the Creator," originally founded in North Carolina in 1973. Subsequently, in 1996, he was chosen leader of "The World Church of the Creator." In 2002, Hale and his church became involved in a trademark infringement case with an Oregon group also calling itself, "The World Church of the Creator." The case came to trial and in that same year, Judge Joan Lefkow ruled in Hale's favor—but a higher court reversed

the decision sending the matter back to Lefkow's court where Hale hoped to enter an appeal.

Angered by the biased nature of the reversal, Hale, some members of his church and supporters wanted to picket the homes of those responsible, a time honored civil rights tactic used by many groups. A man named Evola had "joined" the church and by virtue of his physical size, offered himself both as Hale's bodyguard and a source for the addresses of those being considered for the public demonstrations. Unknown to Hale, Evola was an FBI "plant" paid \$72,000 to "tape" conversations with Hale that would form the basis of a charge of soliciting the murder of the same Judge Joan Lefkow who had originally ruled in Hale's favor!

It is essential to understand that to accomplish his "mission" for the FBI, Evola had to offer this "assassination service" to Hale, a crime called "entrapment!" This is the same crime used to put Ruby Ridge's Randy Weaver in the FBI's cross-hairs for refusing to wear a wire to record the meetings of a white separatist group Weaver occasionally visited. Weaver was later acquitted of the "crime" of altering a shotgun paid for by the same "Evola-type" agent—but not before Weaver's wife and fourteen year old son had been murdered by government agents.

In 2003 Hale, returning to Judge Lefkow's court to enter his appeal and was arrested on the false charge of hiring a "hit man" (agent Evola) to murder Judge Lefkow despite Evola's tapes showing that Hale had repeatedly refused this offer! Subsequently, Hale, after a bogus "trial" lasting about two weeks and despite—or because of—multiple legal improprieties and outright crimes, was found guilty. A fictional "clerical error" [!] allowed the Deep State to use "terrorist sentencing guidelines" to send Hale to prison for forty years, sixteen of which he has spent in solitary confinement where he remains to this day.

The crime(s) against Matthew Hale began long ago when, as was his right, he chose a particular viewpoint and made it public. In other words, Matthew Hale has been confined for perhaps the rest of his life because he believed as an American citizen he had the same constitutional guarantees the rest of us also believe we have. If he is condemned to remain incarcerated, We the People are permitting our own enslavement by the same Deep State that has wrongly condemned Matthew Hale.
